1. <u>Rates and Charges</u>

Rates and charges contained herein are in accordance with Orders of the Kansas Corporation Commission. Tariff references are to the National Exchange Carrier Association, Inc. (NECA) FCC Tariff No. 5, as filed by Blue Valley Tele-Communications in Docket No. 190,492-U, effective January, 1992, and any subsequent revisions to said NECA tariff.

17.1 <u>Common Line Access Service</u>

17.1.1 Carrier Common Line Access Service

Regulations concerning Carrier Common Line Access are set forth in Section 3 of the NECA Access Service Tariff.

		Premiu	m Access	Rate		
		-	Terminating Per Access Minute Originating Per Access Minute	\$0.0000 \$0.0000

			Nonrecurring Charge	Tariff Section Reference
	G.	Telecommunications Service Priority Per service arranged	\$54.63	13.3.3
	H. Controller Arrangement Per Arrangement		Monthly Rate	
			\$100.00	13.3.4 (A)
(C)	I.	Presubscribed Interexchange Carrier (PIC) Change Charge *	Nonrecurring Charge	13.4 (J)
		Applies per telephone exchange servic	e line or trunk for each	intraLATA PIC change.
		1. Submitted using manual methods	\$5.50	
		2. Submitted using electronic metho	ds \$1.25	
		3. Submitted using manual methods when both the interLATA and intraLATA PIC selections are changed simultaneously.	\$2.75	
(C)		4. Submitted using electronic metho when both the interLATA and intraLATA PIC selections are changed simultaneously.	ds \$0.63	

^{*} This charge is generally billed to the end user who is the subscriber to the telephone exchange service. In those instances where the IC both requests the PIC change, and requests the associated charge be billed to it, the telephone company will bill the IC. In the event the subscriber is incorrectly presubscribed due to misassignment on the part of the telephone company, no charge shall apply. In the event the subscriber denies requesting a PIC change, the telephone company will credit the subscriber's account for the PIC Change Charge associated with the alleged unauthorized change, if such charge was billed to the subscriber. The telephone company will then bill the IC responsible for the alleged unauthorized change a PIC Change Charge for the alleged unauthorized change.

* Effective July 2, 2019 the company concurs in the Consolidated Communications Companies Tariff F.C.C. No. 9 for terms and conditions for Special Access.

(N) 17.6 <u>VoIP-PSTN Traffic</u>

- 17.6.1 <u>General</u>
 - A. The section applies to the treatment of voice-over Internet protocol (VoIP) and public switched telecommunications network (PSTN) traffic pursuant to the Federal Communications Commission's (FCC) Part 51 Interconnection Rules and in compliance with the FCC's Report and Order and Further Notice of Proposed Rulemaking in WC Docket Nos. 10-90, etc., FCC Release No. 11-161 (November 18, 2011), ("FCC Order").
 - B. VoIP-PSTN traffic is defined as a customer's interexchange voice traffic exchanged between a telephone company end-user and the customer in time division multiplexing (TDM) format that originates and/or terminates in Internet protocol (IP) format and travels over PSTN facilities. This section governs the identification of VoIP-PSTN traffic that is required to be compensated at interstate access rates, in absence of an agreement existing between the parties, as required by the FCC Order. Specifically, this section establishes the method of separating such traffic (referred to in this tariff as relevant VoIP-PSTN traffic) from the customer's traditional intrastate access traffic, so that such relevant VoIP-PSTN traffic can be billed in accordance with the FCC Order.

17.6.2 Rating of VoIP-PSTN Traffic

A. In the absence of an interconnection agreement between the telephone company and the customer which specifies the treatment of VoIP-PSTN traffic, the relevant VoIP-PSTN traffic identified in accordance with this tariff section will be billed at rates equal to the telephone company's applicable tariffed interstate switched access rates as specified in the National Exchange Carrier Association (NECA) Tariff F.C.C. No. 5.

17.6.3 <u>Required Call Signaling Information</u>

- A. Depending on the signaling system used by the customer in its' network, the customer's facilities shall transmit the following call signaling information to the telephone company on traffic that the customer's end users originate which is handed off for termination on the telephone company's network.
 - 1. Signaling System 7 (SS7) Signaling

When using SS7 signaling, the customer must transmit the calling party number (CPN) or the charge number (CN) information of the calling party in the SS7 signaling stream.

2. Multi-Frequency (MF) Signaling

When using MF signaling, the customer must transmit the CPN or the CN information in the MF automatic number identification (ANI) field.

3. Internet Protocol (IP) Signaling

When using IP signaling, the customer must transmit the CPN or the CN information.

17.6.4 Calculation and Application of Percent VoIP Usage Factor

- A. The telephone company will determine the number of relevant VoIP-PSTN traffic minutes of use (MOU) to which interstate rates will be applied according to 17.6.2, preceding, by applying a percent VoIP usage (PVU) factor to the total intrastate access MOU exchanged between the telephone company and the customer. The PVU will be derived and applied as follows:
 - 1. The customer will calculate and furnish to the telephone company the PVU factor representing the percentage of the total intrastate and interstate access MOU that the customer originates and/or terminates to the telephone company in the State, that
 - a. is sent to the telephone company and that originated in IP format; or
 - b. is received from the telephone company and originates and/or terminates in IP format.

This PVU shall be based on information such as traffic studies, actual call detail, or other reasonable analyses that are relevant and verifiable. The PVU is in addition to the Percent Intrastate Usage (PIU) requirements specified elsewhere in this tariff.

- 2. The telephone company will apply the PVU factor to the total originating and/or terminating intrastate access MOU exchanged with the customer to determine the number of relevant VoIP-PSTN traffic MOUs.
- 3. The customer shall not modify their reported PIU factor to account for VoIP-PSTN traffic.
- 4. The customer provided PVU shall be based on information such as the number of the customer's retail VoIP subscriptions in the State (e.g. as reported on FCC Form 477), traffic studies, actual call detail or other relevant and verifiable information which will be provided to telephone company upon request.
- 5. The customer shall retain the call detail, work papers and information used to develop the PVU factor for a minimum of one year.
- 6. If the customer does not furnish the telephone company with a PVU pursuant to the preceding paragraph 17.6.4 A.1., the telephone company will utilize a PVU equal to zero (0).

17.6.5 Initial PVU Factor

A. If the PVU factor is not available and/or cannot be implemented in the telephone company's billing system by January 1, 2012, once the PVU factor is available and can be implemented, the telephone company will adjust the customer's bill(s) to reflect the PVU retroactively to January 1, 2012. This retroactive adjustment will be made to January 1, 2012, provided that the customer provides the PVU factor to the telephone company no later than April 15, 2012; otherwise, the telephone company will set the initial PVU equal to zero, as specified in section 17.6.4 A.6., preceding.

17.6.6 <u>PVU Factor Updates</u>

A. The customer may update the PVU factor quarterly using the method set forth in the preceding section 17.6.4 A.1. If the customer chooses to submit such updates, they shall forward to the telephone company, no later than fifteen (15) days after the first day of January, April, July and/or October of each year, a revised PVU factor based on the data for the prior three months ending the last day of December, March, June, and September, respectively. The revised PVU factor will be applied and serve as the basis for billing until superseded by a new PVU. No prorating or back-billing will be done by the telephone company based on the updated PVU factor.

17.6.7 PVU Factor Verification

- A. In order to validate the PVU factors supplied, the telephone company may request from the customer an overview of the process used to determine the PVU factors, the call detail records, description of the method for determining how the end user originates or terminates calls in IP format, and any other information used to determine the customer's PVU factors furnished to the telephone company.
- B. Upon receipt of the initial PVU, the telephone company may ask the customer to provide the basis of calculation for PVU implementation. After implementation of the initial PVU, but not more than four (4) times in any year, the telephone company may ask the customer to verify the PVU factor furnished to the telephone company. The customer shall comply, and shall reasonably supply the requested data and information within 21 days of the telephone company's request.
- C. The telephone company may dispute the customer's PVU factor based upon:
 - 1. A review of the requested data and information provided by the customer.
 - 2. The telephone company's reasonable review of other market information, FCC reports on VoIP lines, such as FCC Form 477, or state level results based on the FCC's local competition report or other relevant data.
 - 3. A change in the reported PVU factor by more than five (5) percentage points from the preceding factor.
 - 4. If after review of the data and information, the customer and the telephone company establish a revised PVU factor, the customer and the telephone company will begin using the revised PVU factor with the next bill period.
 - 5. If the dispute is unresolved, the telephone company may initiate an audit. The telephone company shall limit audits of the customer's PVU factor to no more than twice per year. The customer may request that the audit be conducted by an independent auditor. In such cases, the associated auditing expenses will be paid by the customer.
 - a. In the event that the customer fails to provide adequate records to enable the telephone company or any independent auditor to conduct an audit verifying the customer's PVU factor, the telephone company will bill the usage for all
contested periods using the most recent undisputed PVU factor reported by the customer. This PVU factor will remain in effect until the audit can be completed.

- b. During the audit, the undisputed PVU factor from the previous reporting period will be used by the telephone company.
- c. The telephone company will adjust the customer's PVU factor based on the results of the audit and implement the revised PVU in the next billing period or quarterly report date, whichever is first. The revised PVU factor will apply for the next two quarters before new factors can be submitted by the customer.
- d. If the audit supports the customer's PVU factor, the usage for the contested periods will be adjusted to reflect the customer's audited PVU factor.
